Dear Teams,

Thank you for all attending and contributing to the initial kick off meeting. It was great to talk with you all and outline where all the projects are heading for the semester. I am excited to be working with you all throughout the semester and help you achieve great things in this unit.

I now have access to all your BitBucket Repositories. Thank you everyone for adding me. I will be checking your repository for progress throughout the semester. I have already checked the current progress and noticed only 1 team has started their Wiki on Bitbucket. I would encourage you all to implement some templates and practices on Bitbucket ASAP. I have uploaded a few template suggestions to the capstone GitHub page here: <https://github.com/wallarug/capstone2020/tree/master/templates>. My suggestion is that you look at getting your Wiki up and running in the next 24 hours and are consistently updating it every meeting. This will save you time later.

Secondly, there are still 8 people missing from the Discord Server. Please prioritize making sure your whole team is connected into that communication channel. Help your fellow team members who are having difficulties joining. I have created a new join link for everyone: <https://discord.gg/3VcknAe>

I will be pushing out several emails over the weekend about different projects. I will push out the official project scope and requirement document before Monday. This should clarify a lot of the questions that were raised and reassure you what is required over this semester. Please feel free to contact me if you have any questions about this when you receive it. We need to lock in and clarify all the requirements in the first two days of next week.

Thank you again for all joining the meetings. I will be in touch again soon.

Kind Regards,

Cian Byrne
