Hi Nicholas and Team,

I have moved the repository onto GitHub instead. Please feel free to fork and re-import back to your university Bitbucket accounts.

https://github.com/wallarug/2019-capstone-software-ardupilot_gazebo

I have not used Bitbucket in a while and it appears their pricing structure has changed.

Apologies for any inconvenience and thank you for letting me know so soon.

Kind Regards,

Cian
Robotics Masters Limited
