Dear Teams,

I am sharing with you the work of the teams from 2019 Capstone who were completing a different drone research project. Please use the repository as a starting point to jump start this project.

If you could reimport this repository into your Bitbucket project page, that would be great.

https://github.com/wallarug/2019-capstone-software-ardupilot_gazebo

Thank you to the team who alerted me to Bitbucket licensing issue.

Kind Regards,

Cian Byrne
